

Log-in Troubleshooting for Workplace

Step 1:

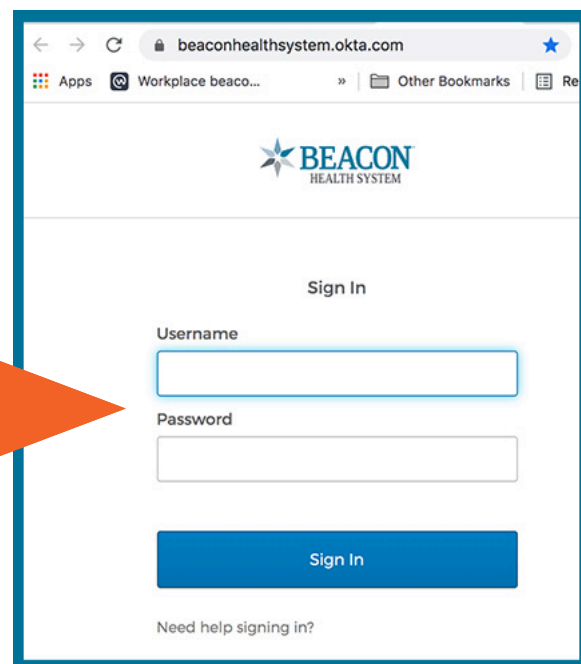

On a computer internet browser (not a smart phone), go to this web address:

<http://beaconhealthsystem.okta.com>

Step 2:

Sign in using your Beacon username (*not* your email address) and Beacon password.

Use the same username and password you use to access Active Staffer, PeopleSoft or other Beacon platforms.

Step 3:

On the next screen, click on the Workplace icon that is shown. Once you do, you should be logged into the Workplace platform.

If these steps do not work for you, your manager may need to check to make sure you have Workplace/Okta enabled in AMS.
